ABSTRACT

Approximately 225 citations of books, journal articles, and conference proceedings dealing with accountability are listed. The bibliography is subdivided into twelve categories--general, technical assistance, needs assessment, management systems, change strategies, performance objectives, performance budgeting, staff development, comprehensive evaluation, program auditing, community involvement, and cost effectiveness. A general bibliography follows with articles discussing measures of accountability, general statements on accountability, and cost-benefit analysis of education and instructional technology. Most of the titles listed were published since 1965. (AL)
